The **Stay Grounded Network** is legally hosted by the Austrian collective *Periskop*. *Periskop* is a non-profit association and works on a non-profit basis.

Our work is mainly financed by donations and foundation funding. We are aware that money generated within the capitalist system is almost always associated with antisocial, uneconomic and undemocratic economic practices, or at least historically associated with values and practices that are contrary to our work. With this in mind, we strive to use money received to advance our social, ecological and democratic goals. It is therefore crucial for us that donors have as little influence as possible on our projects, our content and our activities. We do not take money from companies whose main purpose is contrary to our goals (e.g. fossil fuel companies or those associated with anti-democratic and racist practices).

**Support our work with your donation and help us become even more independent.**
